

February 6, 2017

Federal Communications Commission  
445 12<sup>th</sup> Street, S.W.  
Washington, DC 20554

**WT Docket No. 16-421**

**COMMENTS SOUGHT ON STREAMLINING DEPLOYMENT OF SMALL CELL INFRASTRUCTURE  
MOBILITIE, LLC PETITION FOR DECLARATORY RULING**

Dear Federal Communication Commission,

Let us start out with a line from Elementary, a TV Show on CBS. I want this to be the foundation to this document.

*“Do you have any idea what it’s like to lose a child? If you ask any parent if they would die in place of a daughter or a son. I guarantee you that answer would be **YES!** And, do you know why? It’s not because of **honor** or **duty** or **parental responsibility**, it’s because it’s easier. It’s easier to die than it is to be left behind. Every morning since [my child] passed away, I wake up and I wish it was me instead of [them]”<sup>1</sup>*

The United States Government, Federal Communication Commission (FCC), and the entire wireless industry, with the passing of the “Telecommunications Act of 1996,” continue to bring great harm to all biological life! How many plants, how many animals, how many human lives, **children’s lives** must be destroyed before action is taken to correct failed policies and the corporate paid research to feed the monetary greed of corporations and policy makers.

In the past two decades, it has become very obvious that greed comes before the health of this nation, even **children**. Silencing people or passing laws so people cannot defend their unalienable rights of freedom, health and prosperity. This is a war crime against humanity. It is no different than Nazi treatment of German’s, especially the Jewish population. They use methods established by the German Nazi Gestapo on their consumers and the citizens of the world in order to satisfy their greed. The federal government officials are doing the same thing to the constituents they represent and are allowing themselves to be paid off by the wireless industry greed.

This petition is just another example of corporate greed being sent to the FCC. The FCC needs to put the lives of **children** first. They need to stop the push of wireless devices such as tablets and Wi-Fi in schools. Children today face multiple Wi-Fi routers, multiple cellular company’s frequencies, in some areas multiple radio and television broadcast frequencies, among the barrage of cellular phones, tablets and laptop computers on the streets on a daily basis. Only to come home to the onslaught of wireless radiation from smart televisions, smart or Wi-Fi thermostats, smart microwave, smart refrigerator, smart washer, smart dryer, and other smart appliances around the house that are promoted to their parents as being safe. For some children this is the only environment the parents have any control over and yet the Government, with the wireless industry, is taking this privilege away from parents. **None of these wireless devices are safe!** Yet the FCC, which controls all levels of healthy radiofrequency limits, has failed to update or even fully test the bombardment of multiple frequencies put on the nation’s citizens on a daily basis, especially within our youth today. By failing to update standards that are based on research done three decades ago should constitute as unconstitutional and a war crime among the **children** of this nation because these standards only take into consideration “thermal effects.”

---

<sup>1</sup> Elementary Season 5, Episode 13: “Over a Barrel” (First Aired: January 29, 2017) stated by the character Jack Brunelle played by actor Isaiah Whitlock Jr.

These companies and government agencies are allowed to utilize “Telecommunications Act of 1996” to use anyway they see fit. Senators and Representatives should be cleaning up the “Telecommunication Act of 1996” by putting in place standards and regulations. Yet they choose not to. They choose to accept millions of dollars from the wireless industry. In fact, during the duration of 1997-2004 both the Democrats and Republicans accepted a total of \$44,722,423<sup>2</sup>. This money allowed the telecommunications and broadcasting industries the ability to utilize Section 704 of the “Telecommunications Act of 1996” any way they want. This free reign resulted in the wireless industry to grow into a massive economic powerhouse with people’s health and well-being farthest from the minds of these corporate Chief Executive Officers (CEO’s). This resulted in giving the wireless industry absolutely no accountability to any health effects in the environment through the negative environmental effects their products produce in areas where they are placed. Adults and children continue to suffer because the United States Government allowed the telecommunications and broadcasting industries to use and manipulate the following:

**“SEC. 704. FACILITIES SITING; RADIO FREQUENCY EMISSION STANDARDS.**

*(a) NATIONAL WIRELESS TELECOMMUNICATIONS SITING POLICY.—Section 332(c) (47 U.S.C. 332(c)) is amended by adding at the end the following new paragraph:*

*“(7) PRESERVATION OF LOCAL ZONING AUTHORITY.—*

*“(B) LIMITATIONS.—*

*“(iv) No State or local government or instrumentality thereof may regulate the placement, construction, and modification of personal wireless service facilities on the basis of the environmental effects of radio frequency emissions to the extent that such facilities comply with the Commission’s regulations concerning such emissions.”<sup>3</sup>*

By allowing the Telecommunications and Broadcasting companies to manipulate this section allowed them to grow into the wireless industry of today which does not put people’s health first. This free reign gave rise to the massive economic powerhouse by giving the wireless industry absolutely no accountability and no creditability to any health effects in the environment through the negative environmental effects their products produce in areas where they are placed. You can say that this section does not say anything about health.

Let us take the word environmental. When you define environmental, you find out that we have an adjective to the noun environment. We must take the time to look up some definitions and meanings of “environment.” The word “environment” defined by BusinessDictionary.com states, “[t]he sum total of all surroundings of living organisms, including natural forces and other living things, which provide conditions for development and growth as well as of danger and damage.”<sup>4</sup>

Let us check to see what the definition is with Dictionary.com. It reads under bullet point number two, “**ecology**. the air, water, minerals, organisms, and all other external factors surrounding and affecting a given organism at any time.”<sup>5</sup> Further down we can also read what a British Dictionary definition of “environment” is on Dictionary.com. They state under bullet point number two that “(**ecology**) the external surroundings in which a plant or animal lives, which tend to influence its development and behaviour.”<sup>6</sup>

Common theme here with environment, we have “surroundings,” “organisms or plant or animal,” and “conditions or factors or influence” on them. Using what we just learned, we find that the atmosphere around something living can have either a negative or a positive consequence or both. Therefore, by trying to say that

---

<sup>2</sup> “The Fallout From the Telecommunications Act of 1996: Unintended Consequences and Lessons Learned” As special report prepared by Common Cause Education Fund, May 9, 2005 - Table 1

<sup>3</sup> Public Law 104-104-Feb. 8, 1996 Telecommunications Act of 1996

<sup>4</sup> What is environment? definition and meaning BusinessDictionary.com  
<http://www.businessdictionary.com/definition/environment.html>

<sup>5</sup> Environment | Define Environment at Dictionary.com <http://www.dictionary.com/browse/environment>

<sup>6</sup> Environment | Define Environment at Dictionary.com <http://www.dictionary.com/browse/environment>

Section 704 does not cover health is absurd. The wireless industry is infiltrating the atmosphere or Earth's surroundings with microwave and radio-frequencies which constitute as the environment. This affects the natural electromagnetic charge of the planet, plants, animals, humans, and all living organisms. This barrage of multiple frequencies entering into every living organism's surroundings has affected and influenced the growth, the development and survival of each and every living organism. This constitutes as the health effect through the environment.

This free reign resulted in the wireless industry to grow into a massive economic powerhouse with people's health and well-being farthest from the minds of these greedy corporate CEO's. It led to giving their companies absolutely no accountability and no creditability to any health effects by their products. Adults and children continue to suffer because of Section 704 of the "Telecommunications Act of 1996." They prefer to push **"untested, unreliable, and unhealthy"** devices onto people. People will continue to develop many health issues with cancer being the main cause from the radio frequencies emitted from these **"untested, unreliable, and unhealthy"** devices that they are forcing into our neighborhoods, into our homes, and into our education system. We have the highest cancer rate in the world among adolescents and young adults and the wireless industry is continuing to help keep this high by the utilization of the "Telecommunications Act of 1996" Section 704.

This very section in the "Telecommunications Act of 1996" has allowed corporations to put corporation greed before children's health as they push their way into urban neighborhoods plus rural and agricultural communities. Though they want to create a "good faith" persona with their company as they try to provide these "good faith" applications in our environments, but there is absolutely nothing that is "good faith" when it comes to the wireless industry. There are accounts of "Microwave Sickness" that date back to 1932. Germany proved in the 1930's that there are harmful effects of microwave and radio-frequencies at all levels and that they create harm upon animals and humans.

*"Overloading of Towns and Cities with Radio Transmitters (Cellular Transmitter): a hazard for the human health and a disturbance of eco-ethics"* by Karl Hecht and Elena N. Savoley state my point even further. They write at the bottom of page one onto page two:

*"In August 1932, the German doctor Erwin Schliephake published scientific data in the German Medical Weekly about radio transmitter-induced "microwave" or "radio wave sickness" with the following symptoms: severe tiredness and fatigue during the day, fitful sleep in the night, headaches to the point of intolerability, and high susceptibility to infection.*

*These symptoms, which are also observed in neurasthenia (enervation), were not to be traced back to the thermal effects, but rather to the athermal effects of high-frequency electromagnetic radiation, according to Schliephake's view. The health-damaging effect of high-frequency electromagnetic and electric radiation was reproduced in thousands of investigations.*

*This microwave sickness, induced by athermal high-frequency [electromagnetic frequency or] EMF radiation, was verified by the scientific work of the Russian author Zinaida Gordon from the Moscow Institute for Industrial Hygiene und Occupational Diseases, in 1966 in the Russian language and in 1970 in the English language, among many others. She examined more than 1,000 workers who worked at radio installations, electric utilities, radar stations, etc., over the duration of 10 years. She established the following symptoms:*

- |                                                      |                                     |
|------------------------------------------------------|-------------------------------------|
| - daytime tiredness                                  | - hyperactivity and inner agitation |
| - loss of productiveness                             | - neurovegetative disorders         |
| - sleeplessness                                      | - neurosis                          |
| - headaches                                          | - depressions                       |
| - cardiovascular regulation changes of various types |                                     |

*According to Prof. Gordon [1966], the symptoms strengthened with increasing duration of exposure, and sensitivity to the microwave radiations increased.*

*Reports from Poland were presented by Baranski (1971, 1967, 1966) and Czereski et al. (1972, 1964) about:*

- microwave syndrome and*
- chromosome damage, and by*

*Minecki [1967, 1965, 1964, 1963, 1961] about:*

- psychoneurovegetative disorders*
- neurasthenia*
- chromosome damage*
- embryonic development disorders*

*after the chronic influence of weak high-frequency fields.*

*Karel Marha, from the Institute for Industrial Hygiene and Occupational Diseases Prague (1968-1971), reported about analogous symptoms, like they had already been described by the others. He stressed, though, that the brain functions are especially sensitive to high-frequency electromagnetic radiation.*

*In the USA from 1955 until 1969, eleven large conferences took place under the title “Microwaves – Their Biologic Effects and Damages to Health”. The so-called Richmond Conference in 1969 presented such overwhelming facts that the above-mentioned government report had to be compiled. Besides the microwave symptoms mentioned, gastric bleeding, leukemia, chromosome breakages, cancer, and clouding of the eye lenses were also observed by doctors in the USA.*

*Already in November 1958, the “Security Measures for Persons in the Range of Microwave Generators” was instituted by order of the Minister of the Soviet Public Health Service.”*

This heartless industry to human health must be stopped and the United States Government and the FCC, who have joined sides with this industry, only goes to show how heartless our representatives in congress and in governmental agencies are to the citizens and especially children they represent by allowing an escape goat clause for the wireless industry in the “Telecommunications Act of 1996” Section 704.

The United States Government, FCC, and the entire wireless industry continue to violate The Nuremberg Code of ethics! This was put in place by American judges against inhumane treatment of people in light of what happened at the Nazi concentration camps. **“WE THE PEOPLE”** are the test subjects just like consumers were to asbestos, lead, and the tobacco industry. People do not deserve to be test subjects and treated inhumanely such as the Nazi’s treatment of innocent and unwilling humans in Germany. The very first statement under number one of The Nuremberg Code states that *“voluntary consent of the human subject is absolutely essential.”* Though one would argue they consent by purchasing such products from the wireless industry. However, it also states that one should *“be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable [them] to make an understanding and enlightened decision.”*

**“WE THE PEOPLE”** deserve the “Right to Know” and these companies should be educating the public of these dangers at the time of purchasing these products. The public has no knowledge that the products they use create numerous health effects such as cancer. The manual, usually 200+ pages, is a way to hide the truth from the public. Manuals should never be the only place for health concerns. How many people who work in the wireless industry, the Government or the FCC personnel read manuals of any kind. If a poll was taken I would assume that number would be extremely low. Just like drugs are advertised in magazines, papers, radios and televisions, the wireless industry needs to have the same health side effect warnings at the end of their

advertisements. Would you read a 200+ page drug manual? Would you read all the way to the end where the health effects are of that 200+ page drug manual? I do not think so, and the public should not be forced to do so as well.

This is nothing new about the health effects of radiofrequencies, as I have already pointed out above. Even the United States Navy published a bibliography of more than 2,300 research documents on their report on the “*biological phenomena (‘effects’) and clinical manifestations attributed to microwave and radio-frequency radiation*” written by Zorach R. Glaser, Ph.D., LT, MSC, USNR with the Naval Medical Research Institute in research report number MF12.524.015-0004B. This second printing of this report with its revision was printed on April 20, 1972. In my best interpretation of the text I have of Chapter One, here are a few excerpts below from this five page list.

*A. Heating of Organs<sup>7</sup>*

*6. Brain*

*B. Changes in Physiologic Function*

*3. Changes in the Oxidative Processes in Tissues and Organs*

*4. Liver Enlargement*

*5. Altered Sensitivity to Drug Stimuli*

*6. Decreased Spermatogenesis (decreased fertility, to sterility)*

*7. Altered Sex Ratio of Births (more girls!)*

*8. Altered Menstrual Activity*

*9. Altered Fetal Development*

*20. Electrocardiographic (EKG) Changes*

*21. Alterations in Sensitivity to Light, Sound, and Olfactory Stimuli*

*22. Functional (a) and Pathological (b) Changes in the Eyes: (a) decrease in size of blind spot, altered color recognition, changes in intraocular pressure, lacrimation, trembling of eyelids; (b) lens opacity and coagulation, altered tissue respiration, and altered reduction-oxidation processes*

*23. Myocardial Necrosis*

*24. Hemorrhage in Lungs, Liver, Gut, and Brain<sup>8</sup>*

*25. Generalized Degeneration of all Body Tissue<sup>9</sup>*

*27. Death*

*28. Dehydration*

*29. Altered Rate of Calcification of Certain Tissue*

*C. Central Nervous System Effects*

*1. Headaches*

*2. Insomnia*

*3. Restlessness (Awake and During Sleep)*

*4. Electroencephalographic (EEG) Changes*

*5. Cranial Nerve Disorders*

*6. Pyramidal Tract Lesions*

*7. Conditioned Reflex Disorders*

*8. Vagomimetic Action of the Heart; Sympaticomimetic Action*

*9. Seizures, Convulsions*

*D. Autonomic Nervous System Effects*

*1. Neuro-vegetative Disorders (e.g., alteration of heart rhythm)*

*2. Fatigue*

*E. Peripheral Nervous System Effects*

---

<sup>7</sup> It is also reported that low levels of irradiation produce a cooling affect – “hypercompensation”.

<sup>8</sup> At Fatal Levels of Radiation

<sup>9</sup> At Fatal Levels of Radiation

*Effects on Locomotor Nerves*

*F. Psychological Disorders (“Human Behavioral Studies”) – the so-called “Psychophysiologic (and Psychosomatic) Responses”*

- 2. Depression*
- 4. Anxiety*
- 5. Lack of Concentration*
- 7. Dizziness*
- 8. Hallucinations*
- 9. Sleepiness*
- 10. Insomnia*
- 11. Increased Irritability*
- 12. Decreased Appetite*
- 13. Loss of Memory*
- 16. Chest Pain*
- 17. Tremor of the Hands*

*G. Behavioral Changes (Animal Studies)*

*Reflexive, Operant, Avoidance, and Discrimination Behaviors*

*H. Blood Disorders*

- 6. Blood Glucose Concentration (increase)*
- 7. Blood Histamine Content*
- 8. Cholesterol and Lipids*
- 9. Gamma (also  $\alpha$  and  $\beta$ ) Globulin, and Total Protein Concentration*
- 13. Leukopenia (increase in number of white cells), and Leukocytosis*

*I. Vascular Disorders*

- 1. Thrombosis*
- 2. Hypertension*

*J. Enzyme and Other Biochemical Changes*

*Changes in activity of:*

- 6. Protein Denaturation*
- 7. Toxin, Fungus, and Virus Inactivation (at high radiation dose levels), Bacteriostatic Effect*
- 8. Tissue Cultures Killed*
- 9. Alteration in Rate of Cell Division*
- 10. Increased Concentration of RNA in Lymphocytes, and Decreased Concentration in Brain, Liver, and Spleen*
- 11. Changes in Pyruvic Acid, Lactic Acid, and Creatinine Excretions*
- 12. Change in Concentration of Glycogen in Liver (Hyperglycemia)*

*K. Metabolic Disorders*

- 1. Glycosuria (sugar in urine; related with blood sugar?)*
- 4. Altered Carbohydrate Metabolism*

*L. Gastro-Intestinal Disorders*

- 1. Anorexia (loss of appetite)*
- 2. Epigastric Pain*
- 3. Constipation*
- 4. Altered Secretion of Stomach “Digestive Juices”*

*M. Endocrine Gland Changes*

- 1. Altered Pituitary Function*
- 2. Hyperthyroidism*
- 3. Thyroid Enlargement*
- 4. Increased Uptake of Radioactive Iodine by Thyroid Gland*

*O. Genetic and Chromosomal Changes*

1. *Chromosome Aberrations (e.g., linear shortening, pseudochiasm, diploid structures, amitotic division, bridging, "sticky" chromosomes, irregularities in chromosomal envelope)*
2. *Mutations*
4. *Somatic Alterations (changes in cell not involving nucleus or chromosomes, cellular transformation)*
5. *Neoplastic Diseases (e.g., tumors)*

*P. Pearl Chain Effect (Intracellular orientation of subcellular particles, and orientation of cellular and other (non-biologic) particles)*

*Also, orientation of animals, birds, and fish in electromagnetic fields*

*Q. Miscellaneous Effects*

2. *Peculiar metallic taste in mouth*
7. *Sensation of Buzzing Vibrations, Pulsations, and Tickling About the Head and Ears*
9. *Changes in the Operation of Implanted Cardiac Pacemakers*
10. *Changes in Circadian Rhythms*

First let me reiterate and point out that *"In the USA from 1955 until 1969, eleven large conferences took place under the title "Microwaves – Their Biologic Effects and Damages to Health". The so-called Richmond Conference in 1969 presented such overwhelming facts that the above-mentioned government report had to be compiled. Besides the microwave symptoms mentioned, gastric bleeding, leukemia, chromosome breakages, **cancer**, and clouding of the eye lenses were also observed by doctors in the USA."*<sup>10</sup> AND the Naval Medical Research Institute document in *"Chapter One"* bullet point *"O. Genetic and Chromosomal Changes"* number *"5. Neoplastic Diseases (e.g., **tumors**)"*<sup>11</sup> Both of these documents point out cancers or tumors by USA doctors and the United States Naval Medical Research Institute. These findings had been public for over two decades. This was way before the wireless industry even truly existed and reason I believe for the United States Government to intentionally and purposely put in Section 704 into the *"Telecommunications Act of 1996"* of course with encouragement from the wireless communication industry.

This intentional and blatant disregard to human health especially the **children's** health is why a public release on February 24, 2016 by American Brain Tumor Association. The report found on [https://www.eurekalert.org/pub\\_releases/2016-02/abta-mbt022216.php](https://www.eurekalert.org/pub_releases/2016-02/abta-mbt022216.php) is headlining that *"Malignant brain tumors most common cause of cancer deaths in adolescents and young adults."* Also continues to state that *"nearly 700,000 people in the U.S. living with brain and [central nervous system or] CNS tumors and approximately 15 percent of these tumors occurred in the [adolescents and young adults or] AYA population during the 2008-2012 time frame analyzed in this report. Approximately 10,617 brain and CNS tumors are diagnosed among adolescents and young adults each year and are the cause of approximately 434 deaths annually."* *"Although brain and CNS tumors are the most common type of cancer among people aged 15-19, the report shows how other cancers become more common with age. By ages 34-39 years, brain and CNS tumors are the third most common cancer after breast and thyroid cancer."* *"For these individuals -- who are finishing school, pursuing their careers and starting and raising young families -- a brain tumor diagnosis is especially cruel and disruptive," added Wilson."* Yet the wireless industry with Section 704 of the *"Telecommunications Act of 1996"* is not held liable for any of this. I can guarantee these numbers would not be anywhere close if we had **safe and reliable** technologies. The United States Government, FCC, and the entire wireless industry must be **EXTREMELY** proud of themselves as they continue to push the extinction of our planet and further destroying the health and well-being of the **children!**

---

<sup>10</sup> *"Overloading of Towns and Cities with Radio Transmitters (Cellular Transmitter): a hazard for the human health and a disturbance of eco-ethics"* by Karl Hecht and Elena N. Savoley (Page 2)

<sup>11</sup> *"Bibliography of reported biological phenomena ('effects') and clinical manifestations attributed to microwave and radio-frequency radiation"* written by Zorach R. Glaser, Ph.D., LT, MSC, USNR with the Naval Medical Research Institute in research report number MF12.524.015-0004B. This second printing of this report with its revision was printed on April 20, 1972.

Bear with me as I express another issue here involving microwave and radio-frequencies. Let me talk about a 10 year old girl who suffered from cardiac arrest aboard a plane. This happened on Christmas Eve, please note that this flight left at 8:50 AM, during this flight from Toronto, Canada to London, England it was diverted to Shannon, Ireland for this little girl. Below is a copy of what one of my friends sent out to me.

*"A 10 year old girl suffered cardiac arrest on an Air Canada flight and died. It is unlikely that any coroner's report will implicate the wifi onboard the airplane, but scientists have warned that exposure to wifi can cause heart problems. An airplane is all metal, a faraday cage like a microwave oven. Wifi will bounce around, like light off a mirror, and the effects are increased. This is the second report of cardiac arrests on airplanes over the last few days, but others could be happening and go unreported.*

[http://globalnews.ca/news/3147109/girl-10-dies-after-air-canada-flight-from-toronto-to-heathrow-diverts/?utm\\_source=Article&utm\\_medium=MostPopular&utm\\_campaign=2014](http://globalnews.ca/news/3147109/girl-10-dies-after-air-canada-flight-from-toronto-to-heathrow-diverts/?utm_source=Article&utm_medium=MostPopular&utm_campaign=2014)<sup>12</sup>

---

We now have actress Carrie Fisher who passed away December 27, 2016 at 8:55 AM. I find this really intriguing is the time here as well as her flight that was on December 23 which left from London, England. Yes it was from London, England to Los Angeles, California, USA. She also had a cardiac arrest on her flight. Story is below, Carrie left London on a flight and had cardiac arrest and the ten year old girl above was flying to London on a flight and also had cardiac arrest. Random or coincidence?

<http://www.msn.com/en-us/movies/celebrity/iconic-star-wars-actress-carrie-fisher-dies-at-60/ar-BBxCEWv?OCID=ansmsnnews11><sup>13</sup>

---

Now to add in a little extra here, but what was written by USA Today is really something, a British pop icon, George Michael was found dead. He was found outside his home in London, England. They said he had a long time substance abuse history. OH and he also died of heart failure and now the media saying that is not the case. However you will find this information as you read their write up of Carrie Fisher.

<http://www.usatoday.com/story/life/movies/2016/12/28/carrie-fishers-death-what-we-know-now/95913318/><sup>14</sup>

---

Okay, so I find this hard to believe that these are three random events here. One we have two people on a plane who die of cardiac arrest. What I feel that ties these two together is that there is a push lately for cell phone use on a plane. Some companies already allow people to make phone calls in flight, with some that have built in networks to handle the communications. They are claiming that cell phones are safe to use on planes, Yea, this is a bad idea on all levels with the biggest being wireless radiation inside a metal canister. Can we just call them flying microwave ovens? Below is a link on this issue about cell phones being allowed on flights. We had two people on a plane with the similar type of long distance travel which involved London, England, this is far from just a coincidence.

<https://www.bloomberg.com/news/articles/2016-12-08/airlines-must-tell-passengers-if-phone-calls-allowed-under-plan><sup>15</sup>

---

<sup>12</sup> Global News – “Girl, 10, dies after Air Canada flight from Toronto to Heathrow diverts” by Rahul Kalvapelle, updated December 27, 2016

<sup>13</sup> MSN Entertainment – “Iconic ‘Star Wars’ Actress Carrie Fisher Dies at 60: ‘She Was Loved by the World and She will Be Missed Profoundly’” by Lindsay Kimble, December 27, 2016

<sup>14</sup> USA Today – “Carrie Fisher’s death: What we know now” by Maria Puente, published December 28, 2016 | updated December 30, 2016

<sup>15</sup> Bloomberg Technology – “Airlines Must Tell Passengers If Phone Calls Allowed Under Proposed Plan” by Todd Shields, published and updated December 8, 2016

Let's now talk about the British pop icon and what is now being called an epidemic in the US. That being the opioid epidemic. What I have read in most cases, not all, but most are prescribed by a doctor to relieve pain. Here is a news story just for example:

<http://www.good4utah.com/news/utahs-opioid-epidemic-gains-national-attention/633042094><sup>16</sup>

---

So, what we have are two long time substance users, Carrie and George. Both passed away and both have the central theme being heart failure and the city of London, England. Now lately, I have been pondering this issue since the main stream media started really broadcasting countless stories on the issue. Granted this is solely my personal feelings and you may feel otherwise, but I feel the reason we are having an opioid epidemic in the US is because of wireless radiation. The wireless radiation we are pumping into our atmosphere every second of every day and how it destroys and mutates the body. Creating, and in some cases, unbearable pain and suffering to those who cannot be around it leaving people to find pain relief. This pain relief is granted to them off the lack of knowledge of what the true root of the problem is. Basically, how I like to put it, *“let's put a Band-Aid on cancer.”* Why not? It solved the problem. We gave you a Band-Aid instead of digging in deeper to find out why you got cancer to begin with. This lack of knowledge created by the United States government and the wireless industry by pushing all truth under the rug to keep all knowledge from the public is utterly pathetic.

People are not told the truth by their doctors, who in most cases, are not trained properly to deal with wireless radiation. Wireless radiation from all electronic devices that communicate wirelessly or without wires alters and affects everything it is around. Worse yet is that many independent researchers in many, many countries around the world have proven so many harmful effects from wireless radiation. The United States government fails to acknowledge they screwed up by not putting into place guidelines to protect the people of the US as well as everyone else that live on this planet. This statement is also true for a few other countries and including the United Nations. Proper regulations will educate doctors which in return means accurate and proper treatment of patients. I personally feel there would not be an opioid epidemic if we did not have the wireless industry infiltrating everyone's daily lives with toxic non-ionizing, low radiofrequency. You can call it whatever you want. It is still wireless radiation!

Of course why would they want to be held accountable for destroying plants and animals. Why would they want to be held accountable for the destruction of future generations. What really gets my goat and that really makes me mad is the disregards they have to protect man kind and their push to our extinction on this planet. From issuing wireless tablets to children in schools around the world for education instead of a hard copy book to Mobile Help (<http://go.mobilehelp.com/>) for the elderly. Mobile Help is being broadcasted to have the benefits of allowing seniors to leave their house so they can have freedom *“from coast to coast”* while still being able to call 911 in an emergency event like *“I have fallen and I can't get up!”* I believe seniors should have means to feel safe and secure. However, giving them a device that is no different than a cell phone to place their 911 help call is not the answer. I cannot believe that this company has over four and half star rating for we all know how reliable 911 service is on a mobile device. If you don't have a clue what I am talking about here are two videos to watch:

<https://youtu.be/cUv9Waaws9U><sup>17</sup>

<https://youtu.be/5EVC2RZRDkE><sup>18</sup>

---

<sup>16</sup> ABC Utah Channel 4 – Good 4 Utah – “Utah's opioid epidemic gains national attention” by Kimberly Nelson, published and updated December 28, 2016

<sup>17</sup> Norcast Telecom Networks YouTube Channel – “The Difference Between Calling 911 on a Cell Phone vs a Landline” published on November 7, 2014

<sup>18</sup> Dave Malkoff YouTube Channel – “911 Can't Find You” – AMHQ “Caller Calls 911 in Wrong Country” & AMHQ “GPS Issues for 911 Operators” published on September 21, 2016

Therefore, why would anyone want to have a device that cannot get them what they need in a crisis or an emergency event? And why would there be a four and half star rating for Mobile Help? Then again, how wrong I am to think this way. Now they are promoting a new technology that, I believe is behind the massive push to get rid of the existing landline phones and the massive push for services now like that of Mobile Help. Whose ads are blanketing the channels that the seniors watch like MeTV, Grit, etc... I see more ads for Mobile Help than its competitor Life Alert which once used landlines for its services.

Also, on top of this push is the fact that the US Government has a program that helps give out cell phones to low income people like cotton candy at the fair. However no such assistance is granted to those wanting landlines, might I add. Below is how technology is being praised for saving millions of dollars for the telecommunications industry so they do not have to upgrade their 911 service.

<https://youtu.be/5EVC2RZRDkE><sup>19</sup>

With all this said, it solves the problem, simple right. The telecommunications industry does not have to spend millions or billions of dollars fixing or upgrading the system. The massive deployment of these small cell infrastructure to help improve 911 services is false and totally bogus. This is just another means of corporate and government control of human rights including taking the rights of children away.

There are thousands of people who suffer from wireless radiation. Whose voices are being ignored by the corporate greed and who want to see this planet in all its glory. Voices who are not against technology, but are against how ignorant the technology field has become by putting profits before consumer safety. Whose human rights as human beings are being violated on a daily basis by these very companies that are pushing profits before safety.

Just a side note here: On top of all this comes the very existence within the health care coverage through Obamacare is the greatest violation of human rights. In this wonderfully crafted law that the main stream media likes to put it, there is something every United States Citizen should take note of. It is stated in H.R 3200 section 2521 says that you are required to have an electrical device implanted and the only person who controls the contents of this device is the Secretary of State. If you don't believe me about the electronic device, get a full copy of H.R. 3200 "The Affordable Healthcare Act" and look it up. It's there. Which goes alongside the FCC's plan to have transmitters located about twelve houses apart and FCC's ex-chairman Tom Wheeler's own statement that *"everything that can be chipped must be chipped."*

Take the time to think about what I have presented. To those who may not believe in what I have said, think about the future. What if what I said was true and you did nothing to help prevent it. Then what do you have to offer? Sorry to your grandchildren, for your grandparents decided to not listen to the canaries in the coal mine. I don't know if you, as in your grandchild, will ever forgive us for destroying the life they should have had. If only we didn't listen to the greedy corporate messages and believed in their lies. If only we investigated the issue ourselves and discovered the truth so we could make informed decision. We are sorry for not fighting for your futures.

OH WAIT! Should people be forced to investigate everything in their lives? I personally believe that corporations should be educating their consumers about their products and let the consumers decide what they want to do with what they are told. Congratulations to Berkley for passing the "Right to Know" however corporations are fighting this. My thoughts personally to these corporations are 'boycott their products.' Every person should have the right to know that the cell phone they have in their hand can create cancer, alter DNA, damage melatonin, leukemia, autism, etc... Just to name a few.

<sup>19</sup> Dave Malkoff YouTube Channel – "911 Can't Find You" – AMHQ "Caller Calls 911 in Wrong Country" & AMHQ "GPS Issues for 911 Operators" published on September 21, 2016

Whether you personally suffer or not from ailments, this write up does not mean you should ignore those that are canaries in the coal mine. Be a true family member or friend to the ones who are victims of Section 704 of the "Telecommunications Act of 1996" and support their cause for safe and reliable technology for everyone. Support for safe zones for people to live including areas where there are alternative electrical means for power. We are an electrically charged human being and the massive amounts of electricity, dirty electricity and wireless radiation has already been proven to damage our personal electrical charge within the human body. Put down the electronic devices that communicate wirelessly or without wires. Reduce your electrical pollution to the world within your house by minimizing the amount of devices that need to be on at any given time. As well as demand that people need to be held accountable for violating basic human rights and that we need safe reliable technology. Any technology advancements that kills human life is not technology for the future and should never be heavily considered for any involvement in making and advancing the future of this planet.
